

FTP PROTOCOL TO SEND LARGE files

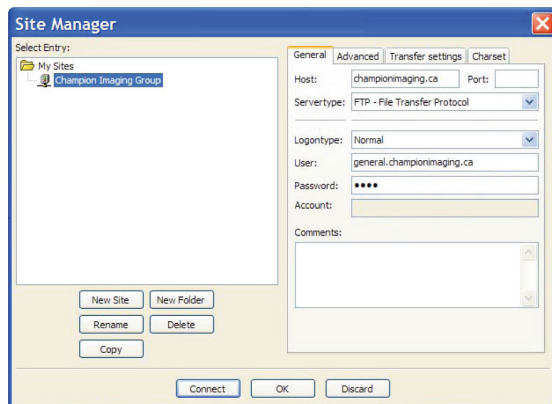

First you must have an FTP software installed on your computer

FOR PC USERS

If you do not have an FTP software and are looking for a free software, we can suggest using FireZilla, a freeware software. (<http://www.download.com> and do a search for FireZilla).

Download the software and install it on your PC.

Create a new site CHAMPION IMAGING GROUP and save it (see screen capture below).

FOR MAC USER

If you do not have an FTP software and are looking for a free software, we can suggest using ClassicFTP, a freeware software. Use Google to do a search for CLassic FTP.

Download the software and install it on your MAC.

FOR BOTH PLATFORMS

Host: ftp.championimaging.ca
User name: general.championimaging.ca
Password: user

Save all your files in a folder with your company name and/or job reference as the folder name. To avoid corruption, the folder can be compressed.

Drag and drop your files on our FTP site.

Once the files have been uploaded, send an e-mail to: info@championimaging.ca to give us your printing specifications.

We will do daily maintenance and delete any files that are not clearly identified or accompanied by an e-mail.
