SOFTWARES

We work your files in the latest versions of the following softwares:
Photoshop, Illustrator, InDesign and Quark X Press.

We don't use these softwares: Corel Draw, Word, Powerpoint, Page Maker, Freehand.

COMPULSORY INSTRUCTIONS

-Photoshop images placed in another application, such as Illustrator, must be linked (not embedded) to reduce size and allow for separate treatment of items.

-Always include fonts (unless they are converted to outlines, which is preferable).

-Supply a color proof as close as possible to the desired final result.

-Supply Pantone references when possible (if applicable). Don't convert your PMS in CMYK or RGB. For a better color reproduction Pantone colors should be edited as spot colors.

-Clearly indicate final format as well as enlargement ration (i.e. 25%).

-Supply images of 100 dpi at final format for print larger than 30" x 40". For smaller format supply images at 200 dpi.

-Provide one single image, for panel jobs. We will tile it into the appropriate number of panels.

-To maximize the quality of your impression, texts and logos must be made in vector form.

ADDITIONAL INFORMATION

-Pre-press rate : 75\$/hour.

PROOFING

-We will provide a small paper color proof for all size over 20" x 24".

-A PDF proof can also be provided, but should not be used for color approval.

OUR FTP SITES

Please contact us to receive a user name and password.

NOTE: Please clearly identify files using your name and job reference.

E-mail info@championimaging.ca, once the file has been uploaded.

FOR FURTHER TECHNICAL INFORMATION, PLEASE CONTACT US AT ORDER@CHAMPIONIMAGING.CA.
